

Welcome to our Practice!

We appreciate your choosing our office to care for your dental health, and consider it a privilege to serve you.

We are committed to providing you with the finest and most modern dentistry possible. Drs. Kerper and Kane, both graduates of the UCLA School of Dentistry continually update their skills to offer the most technically advanced techniques and therapies available. We have assembled a team of highly experienced and caring people to make your visits comfortable and efficient.

It is our sincere desire to have every patient fully informed of their treatment needs and options, and of the costs involved. We have a highly skilled and dedicated administrative staff that will estimate your insurance benefits, and as a courtesy will bill your insurance and keep track of those payments for you. Please understand that we do not work for your insurance company and that ultimately you are responsible for all charges incurred.

We respect your time and your pocketbook! We will make every effort to schedule convenient appointment times and to see you promptly when you arrive. Time will be set aside specifically for you so that your treatment can be done carefully and efficiently. Just like you, we are concerned about rising health care costs and are trying to keep our fees as low as possible. You can help by keeping your scheduled appointments; broken appointments are wasteful and increase the cost of providing care to all of our patients. By making your payments at the time of service you are reducing our administrative costs and we can hold the line on fees and continue to accept your insurance plans.

It is our goal that your experience here is the best you have ever had in a dental office. We look forward to serving you!

Dr. Stephen Kerper
